# Paid [**Deep Learning** and **ExplainableAI**]
Master-, Bachelortheses and Projects

Frameworks: Python (tensorflow, keras, PyTorch) + OpenCV

Topic: Medical Image Processing (Gigapixel images)

- **object detection, scene parsing**
- **caption generation (NLP)**
- **[variational] autoencoders**
- **meta-learning**
- **eXplainableAI methods (e.g. heatmapping)**

Payment

- EUR **4,123,20** Basis + EUR **2,061,60** Bonus
  if the grade of your thesis is "very good (1)"

Studies

- Computer Science
- Software Engineering
- Information and Computer Engineering

Contact
